OUR STORY

Huski Chocolate was born in the mountains of Sweden in the winter of 2012 by two Nordic adventurers, Linus Wessman and Robin Hallberg. They created an all-natural hot chocolate that brought comfort to the brave in the most challenging of conditions.

Since then, we have grown, and we still do. With passion and commitment we create chocolate drinks, without compromising on flavour, quality and sustainability. And we encourage everyone to join the adventure.

Getting warm during an adventure is great — staying warm is even better. As the Huski community grew, the merchandise started to become a little too popular. So the Huski Chocolate team met with their friends at Sport Innovation, a sportswear manufacturer, to discuss new opportunities. After only a few hours of meeting, Huski Wear was born, and we went from idea to reality in record time. We set out to create high-quality sportswear with high functionality and thought-through design for the adventurous mind all around the world.

Today we provide apparel to alpine skiing teams in Sweden, Norway and Austria. We have recently entered the Finnish market, and we are continuing our adventure with new teams in countries around the world.

— Join us.

CarbonZERO
Product

CarbonZERO help us accurately trace and measure 100% of the product's carbon emissions with a life-cycle analysis, according to the GHG Protocol.

They also help us find the hotspots and map out a long term reduction plan to actively reduce the carbon emissions accounted for in our climate report.

We offset 100% of the carbon emissions that can't be removed in the short term, by investing in certified forest projects in Northern Europe.
